VIGNESH GOVINDA

UX Designer

United Kingdom | +44 7553995933

vigneshgovinda3@gmail.com

User-centred Service & UX Designer with 4+ years of experience designing accessible digital services informed by user research and evidence. Experienced in creating and improving content, information architecture and user journeys using qualitative and quantitative insights. Skilled at collaborating with multidisciplinary teams, facilitating stakeholder workshops, synthesising research findings and designing inclusive digital experiences aligned with accessibility standards and user needs.

WORK EXPERIENCE

UX Designer | Currys Plc | United Kingdom **Dec 2025 – Sep 2026**

- Developed customer journey maps, service concepts and design artefacts to expose friction across customer interactions and show where the end-to-end experience could improve.
- Redesigned the iD Mobile product detail page so customers make one decision at a time instead of seven at once. Commissioned a Contentsquare analytics audit, benchmarked the page against Apple and Google, and designed a guided, step-by-step flow across mobile and desktop.
- Planned and ran two rounds of unmoderated usability testing (10 participants each) and a head-to-head comparison with the live page, where 90%+ of participants found the new design easier to navigate and understand. Worked with developers on a coded prototype ahead of handover, with an A/B test against the current page to follow.
- Translated customer and stakeholder insights into actionable design recommendations, contributing to a reported 40% improvement in product satisfaction.
- Collaborated with product managers, developers and business stakeholders to translate customer and operational requirements into service blueprints, user stories, prototypes and prioritised design improvements.
- Coordinated design priorities and communicated recommendations to support decisions on customer experience, service delivery and ongoing improvements within a growing retail business.

Service Designer | SHOULD Ltd (Startup) [Freelance] | United Kingdom **Jun 2025 – Nov 2025**

- Supported a fast-growing design startup as it scaled, contributing to both service design and UX design. Mapped current and future-state service journeys, identifying customer pain points, process gaps and opportunities to improve consistency across digital touchpoints.
- Applied WCAG accessibility standards and Government Digital Service (GDS) design principles to identify barriers and validate solutions early, contributing to a 15% reduction in development rework.
- Facilitated collaborative design discussions to align customer needs, technical constraints and business priorities, helping the team move from discovery and design into Agile delivery as the business grew.

Architect | Build a home | India **Nov 2023 – Apr 2024**

- Led stakeholder workshops to gather technical and business requirements for ongoing projects, resulting in structured documentation and clearly defined workflow processes that improved project clarity and team alignment.
- Contributed to sustainable design projects for residential spaces focusing on eco-friendly materials and practices, applying user-centred design principles.
- Designed and led luxury residential and apartment projects, managing team coordination, making critical design decisions and building trust and relationships with the client.
- Worked across business and technical teams to balance user needs, operational requirements and technical feasibility, supporting iterative service improvements through Agile delivery.

Project Architect | Govianu Construction | India **Jan 2023 – Oct 2023**

- Collaborated with developers, business stakeholders and delivery teams to translate customer requirements into backlog items and interface improvements, reducing onboarding time by 20% and increasing customer satisfaction by 15%.
- Coordinated multidisciplinary teams across project lifecycles, managing dependencies, delivery risks and stakeholder expectations to reduce project delays by 20%.
- Reviewed technical documentation, drawings and schedules to ensure accessibility, compliance and quality standards, reducing documentation errors by 20%.

Architectural Intern | BSD Architecture | India **Feb 2021 – Dec 2021**

- Supported senior designers by gathering stakeholder requirements, preparing concept visuals and maintaining accurate project documentation in a fast-paced design environment.
- Created visual design and presentation artefacts to communicate user flows, spatial constraints, accessibility considerations and design rationale to clients and internal teams.

EDUCATION

MSc Digital Service Design, Brunel University London **2024 – 2025**
Led discovery research for a Smart Housing Affordability service and developed an AI-powered personal finance application.

Bachelor of Architecture, Reva University **2016 – 2022**
Built strong foundations in spatial design, systems thinking, user-flow mapping, visual communication and concept development.

SKILLS

- **Design:** Service Blueprinting, Customer Journey Mapping, Design Thinking, Systems Thinking, Stakeholder Workshops, Requirements Gathering, Information Architecture, Interaction Design, Wireframing, Prototyping, Design Systems.
- **Research:** User Interviews, Usability Testing, A/B Testing, Analytics Audits (Contentsquare), Heuristic Evaluation, Insight Synthesis, Personas, Customer Journey Mapping.
- **Tools:** Figma, Adobe XD, Adobe Photoshop, Adobe Premiere Pro, ServiceNow, Salesforce Marketing Cloud, Basecamp, Dreamweaver, Sketch, InVision, WCMS, HTML, CSS (Basics), Tableau, GitHub.

ACHIEVEMENTS AND AFFILIATIONS

- Led Service Design Network at Brunel University, demonstrating leadership, collaboration and commitment.
- Registered as an Architect with the Council of Architecture (COA), India.
- Awarded Best Design for the Product Design module in 2022.
